

Gadgets 'n' gizmos

with Col Galley

IN-CAR MICROWAVE from Maplin. Check it out at www.maplin.co.uk or call 0844 557 6000 to buy via mail order from Maplin catalogue

HOW many times have you gone for a nice drive to the seaside or country and taken along some paste butties and a flask of tea that ends up so stewed that it looks like the oil in your engine?

And how many times have you sat munching on your boring sandwiches and slurping that nat's piss and thought to yourself: "I could murder a nice, hot steak and kidney pie with mushy peas and a lovely, fresh cup of Earl Grey?"

Well, top electronics retailer Maplin may have just done you a massive favour because they have brought out a brilliant microwave that you can use in your MOTOR!

It's compact and portable yet it delivers high speed cooking times, revving up to provide tasty meals on the move in a matter of minutes.

The stylish unit can be powered via a 12V cigarette lighter socket or direct from a vehicle's battery and it comes with both leads supplied.

With a robust steel construction and heavy-duty handle, it even has an LED screen that features touch screen technology.

The microwave can give up to 660W of power if connected directly to a car battery and 175W of power if used via a cigarette lighter socket.

Lorry drivers can also take advantage of this brilliant piece of kit and at the moment it's on special offer at the knockdown price of £89.98 (normal RRP £129.99) so get motoring to your nearest Maplin and grab one now.

STOP™ CLINICAL SKIN RENEWAL DEVICE. Available exclusively at Selfridges this month followed by Harvey Nichols and other top beauty retailers at £396

I HOPE Keith Richards reads this because I've discovered a device that will stop him looking like one of those wrinkly Sharpei dogs after a nice servicing the neighbourhood bitch!

It's called STOP™ and it's a brand new gizmo that reverses signs of ageing by helping to tighten the skin and reduce fine lines and wrinkles . . . all in the comfort of your own home.

STOP™ is a hand-held device powered by TriPollar™ Radio Frequency (RF) technology that has already transformed the professional beauty market with anti-ageing treatments that boost skin renewal, producing younger, smoother skin.

Now the same proven technology is available in a sleek, palm-sized device that offers clinical results in the home.

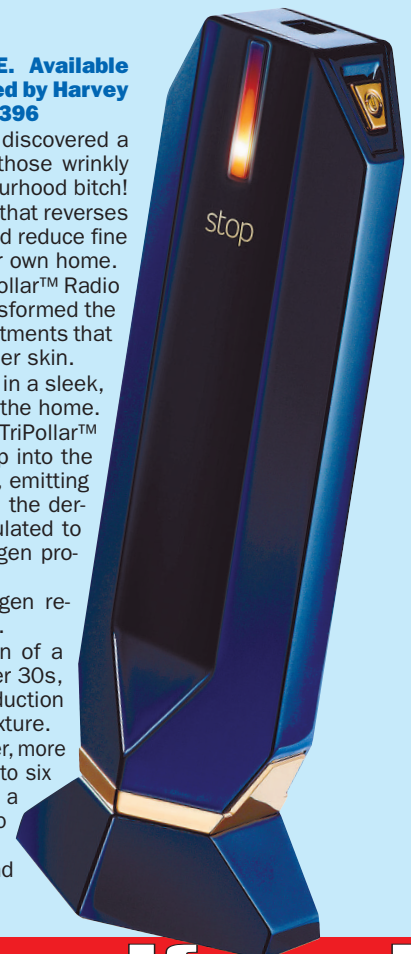

Scientifically developed and clinically proven, TriPollar™ technology focuses four low power beams deep into the dermis; much like a laser lens focuses its light, emitting low power high frequency electrical energy into the dermis, which means that dermal activity is stimulated to tighten collagen fibres and increase new collagen production.

Fibroblasts are stimulated, increasing collagen replenishment and resulting in dermal thickening.

Basically, a ticker dermis will make the skin of a woman in her 40s look and feel like she is in her 30s, with visible, long-lasting results including the reduction of fine lines and wrinkles and improved skin texture.

From the initial treatment, the results of smoother, more radiant skin are noticeable. Over a period of four to six weeks, repeating the 15-minute treatment twice a week, long-lasting results are achieved. They also come in three colours — red, blue and white.

So, Keith. What do you think? Give it a go and you could end up looking like Cliff Richard!

Stop playing with yourself and
